

Lincad brings to market battery chargers designed with UK MOD

See the Caravel Mk2 and Power Scavenger at DSEI 2015 Stand-S4-430

Press Release – 9th September 2015

Following the successful showcasing in 2014 of the prototype Caravel Mk2 and Power Scavenger battery chargers, Lincad is pleased to announce that it has now brought the finished products to market. The company will be demonstrating the capabilities of both chargers, designed in co-operation with the UK MOD, on its stand at DSEI 2015.

Lincad is a leader in the design and manufacture of bespoke batteries, chargers and power management systems for the military and other specialist applications. Operating since 1986, Lincad is a privately owned UK company with nearly 30 years' experience at the forefront of battery and charger technology and design.

Caravel Mk2 Charger

The Caravel Mk2 Charger is an enhanced, cutting edge replacement for the original Caravel Charger which has seen front line service with British and international armed forces for 15 years. Featuring the very latest developments in battery charging technology and design, it offers multi-chemistry charging of batteries from any original equipment manufacturer, making it possible to bring an entire battery fleet under the management umbrella of a single charging unit. With twin USB ports, it will also charge USB-enabled devices such as smartphones and tablets simultaneously.

Power Scavenger

The Power Scavenger is Lincad's all-purpose solution to mobile power management in any situation where reliability, light weight and ease of use are critical. Offering the end user true flexibility in charging options, it can charge different battery types of any electrochemistry as well as USB-enabled devices from any DC input such as solar panels, a vehicle or other batteries.

In addition to armed forces across the world, the Caravel Mk2 Charger and the Power Scavenger will also be of interest to any organisation conducting operations in extreme environments.

Brian Soden, Managing Director of Lincad, commented:

"We're delighted to be exhibiting the Caravel Mk2 Charger and the Power Scavenger at DSEI 2015. Both of these chargers, designed in co-operation with the MOD, demonstrate the strength of our commitment to the continual evolution of our product range and we're looking forward to the opportunity to demonstrate that to the international delegations who will be attending the show."

About Lincad

www.lincad.co.uk

@LincadLtd

- Lincad is a privately owned UK company with over 29 years' experience in the design and manufacture of standard and specialist batteries, chargers and intelligent power management systems.
- The core business of Lincad is the supply of batteries, chargers and intelligent power management systems for military applications. Its main customers are the UK Ministry of Defence (MOD), UK Defence Primes and Strategic Military and Defence Partners. More recently, Lincad has been involved in developing new battery, charger and power management technologies for specialist applications across a range of different sectors.
- Lincad is an ISO 9001 accredited company with expertise in battery chemistry and systems engineering and operates out of two sites in Surrey in the South East of England where the design and manufacture of all its products takes place.
